Subject: Murai Specific Plan, meeting March 5, 2018

Hello: I am unable to attend the March 5, 2018 meeting due to health issues. Please consider my input from my previous letter, and know that I am still strongly against the Murai Specific Plan ColRich development.

The answers which the City and/or Developer provided to my letter were insufficient and do not alleviate my concerns about noise, animal safe passageway and animal drinking water, pollution (noise pollution, air pollution, light pollution, ground and water pollution), wildfire danger and traffic that I believe this development would cause.

I am also strongly opposed to the San Marcos Highlands development for the same reasons.

And please do not under any circumstances allow Las Posas Road to be extended North to connect with any other through streets such as Buena Creek. That would enable commuter traffic from Riverside County and other points North to use Las Posas as a thoroughfare instead of those drivers using the I-15/78 interchange as they should.

Pass along my comments from this email to other members of the Planning Commission and City Council, please.

Sincerely, Jillcene Bachman
