PUBLIC HEARINGS

2. Project No: TA22-0003 and EX22-044

Applicant: City of San Marcos

Request: Municipal Code update for implementing the requirements of AB 1236 to streamline

processing of permit applications for Electric Vehicle Charging Stations.

Location of Property: City Wide

Recommendation: Staff recommends approval to City Council

Jacqueline Paterno, Deputy City Attorney with Lounsberry, Ferguson, Altona, & Peak: gave the presentation.

PUBLIC COMMENTS

None

CLOSED PUBLIC HEARING

Planning Commissioners discussions included: Simplicity of the checklists; 5% make ready; how does this work with State Law AB 2097; staff funding impact for the streamline process; clarification on a health and safety denial; the review process for installing an EV fast charging station.

Staff Response: The checklists should be easy to download and complete. The 5% comes from the Climate Action Plan relating to non-residential projects. The 5% is the total space required for EVs and overlaps with the State Law. If State Law says no parking, then there will not be any EV charging stations. Streamlining efforts are for the Building permits and the checklists cover the required information the City asks for. Staff does not expect any significant staffing impacts with this streamlining process. All contents of the checklist are related to health and safety, following the electrical code. Larger projects cannot be reviewed over the counter and takes 15 business days for first round staff review.

Action:

COMMISSIONER NORRIS MOVED TO RECOMMEND APPROVAL TO CITY COUNCIL EX22-044 AND RESOLUTION PC 22-5018 FOR TA22-0003; AND SECONDED BY COMMISSIONER CRAIN. MOTION CARRIED BY A ROLL CALL VOTE.

AYES: COMMISSIONERS: NUTTALL, KIM, NORRIS, CARROLL, RIOS, FLODINE, CRAIN

NOES: COMMISSIONERS: NONE

ABSENT: COMMISSIONERS: CAVANAUGH

ABSTAIN: COMMISSIONERS: NONE

3. Project No: TA19-0002 and EX22-043

Applicant: City of San Marcos

Request: Text Amendment to modify the Wireless Telecommunications Facilities Ordinance (SMMC Chp. 20.465) and recommend to the City Council adoption of a Policy for the Deployment of Small Wireless Facilities within the Public Rights-of-Way.

Location of Property: City Wide

Recommendation: Recommend approval to City Council

Sean del Solar, Senior Planner: gave the presentation.

Planning Commissioner discussions included: Inquiry on who will be covering the extra costs and maintenance; was City staff able to review the letter sent by the Verizon team and were there any revisions made to the ordinance language; installation charges; confirmation of the change; lease charges; will providers use the same pole or install new poles; who incurs charges when a pole needs replacing due to damage.

Staff response: Applicants are responsible for the extra costs. To confirm, the changes received from Verizon are reflected on staff's recommendations.

Michael Johnston, Telecom Law Firm response: All costs for maintenance are paid by the applicant in the permit process. The only costs to the City is reviewing the application, which is reimbursable through the application fees. Ongoing maintenance costs are the applicant's responsibility after permit issuance. Verizon comments were read and consulted with City Staff. A few changes were made to annual compliance reporting and amount of distance a cabinet can be mounted away from a pole. These changes were made in the attachments presented to you. There are a list of category fees that are permissible to charge, and some that are impermissible to charge. The approach that San Marcos is taking is charging for application and permit fees. There is no rental value when attaching to a City light pole. That subject was addressed in the FCC Small Solar and is preempted by federal law. To align with federal law. The lease is \$270 per pole, per year, however this does not apply in this situation, per the FCC. The policy favors using existing structures to avoid the clutter of many new poles. There will be poles which multiple providers are able to use the same antenna, but provide their own radio unit. The City will have a licensing agreement with the applicants that they must purchase 5 or 6 poles to keep at the maintenance yard and use in case a pole is knocked down and needs replacing.
